

# Enhance Evidence Based Care

With Ethical Decision-Making

Presented by: Heidi-Bausch-Ryan, PsyD, LP

# Learning Objectives

1

**Identify** the ethical dimensions of common dilemmas arising in clinical practice

2

**Apply** and practice ethical decision-making models.

3

**Discuss** strategies to collaborate effectively with interprofessional teams to promote overall mental wellness, including engaging in regular team meetings, sharing insights from different disciplines, and developing integrated care plans that address holistic needs of patients.

# Definitions

## Ethical Principles

- Moral values informing ethical codes, standards, & guidelines
- Examples: Social justice, confidentiality

## Ethical Codes

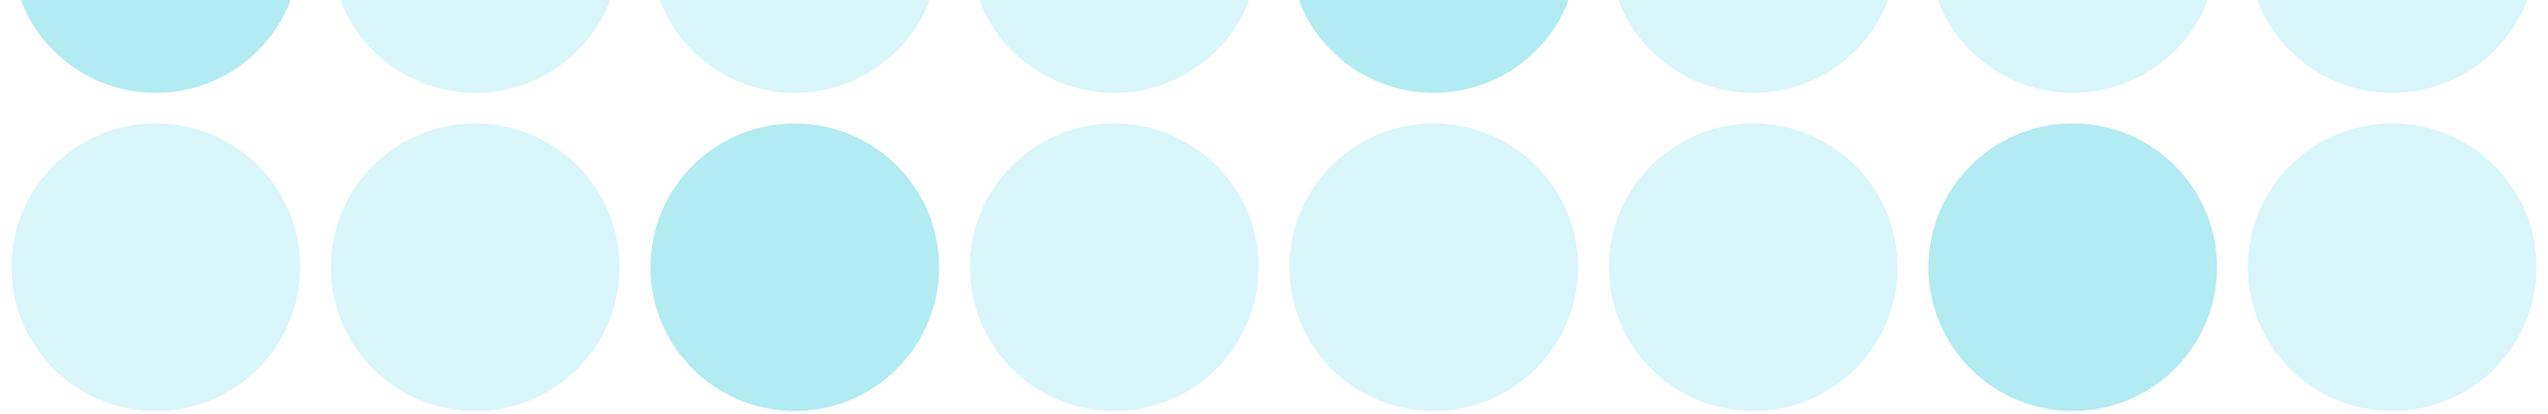

- System of principles governing morality & conduct
- Discipline or profession-specific

## Ethical Standards

- Specific & enforceable requirements
- Designed to fulfill professional obligations

## Ethical Guidelines

- Recommendation w/ modifiers (e.g., "reasonable")
- Address need for professional judgement in unique scenarios

# Ethical Principles

# American Psychological Association

## *General Principles*

### **Beneficence & Nonmaleficence**

Do good and do no harm with clients.

### **Fidelity & Responsibility**

Maintain professional standards of conduct.

### **Integrity**

Maintain honesty in professional practice.

### **Justice**

Uphold fair and just practices.

### **Respect for People's Rights & Dignity**

Honor clients' rights, identity and culture, and autonomy.

# APA Ethics Code

Resolving Ethics Issues

Competence

Human Relationships

Privacy and Confidentiality

Advertising & Public Statements

Record Keeping and Fees

Education and Training

Research and Publication

Assessment

Therapy

# American Counseling Association

## *General Principles*

### The Counseling Relationship

Foster the welfare of the client.

### Confidentiality & Privacy

Maintain and communicate limits to confidentiality and respect client for privacy.

### Professional Responsibility

Practice in non-discriminatory manner, within boundaries of competency, and with honesty.

### Relationship with Other Professionals

Foster quality interactions with colleagues.

[Review for  
more  
information  
on above:](#)

# American Association for Marriage & Family

## *General Principles*

### Responsibility to Clients

Practice principles of non-discrimination, informed consent, minimal multiple relationships, and so forth.

### Confidentiality

Maintain responsibility of disclosing limits, protection and access to records, respecting the confidences of each person, and so on.

### Professional Competency & Integrity

Know regulatory standards, identify conflicts of interest, practice within scope, develop new skills, etc.

### Technology- Assisted Professional Services

Appropriate, competent use of tech with informed consent, HIPAA compliance.

Review for  
more  
information on  
above

# National Association of Social Workers

## General Principles

### Service

Help those in need.

### Social Justice

Challenge social injustice.

### Dignity & Worth of the Person

Maintain respect for all.

### Importance of Human Relationships

Recognize as central.

### Integrity

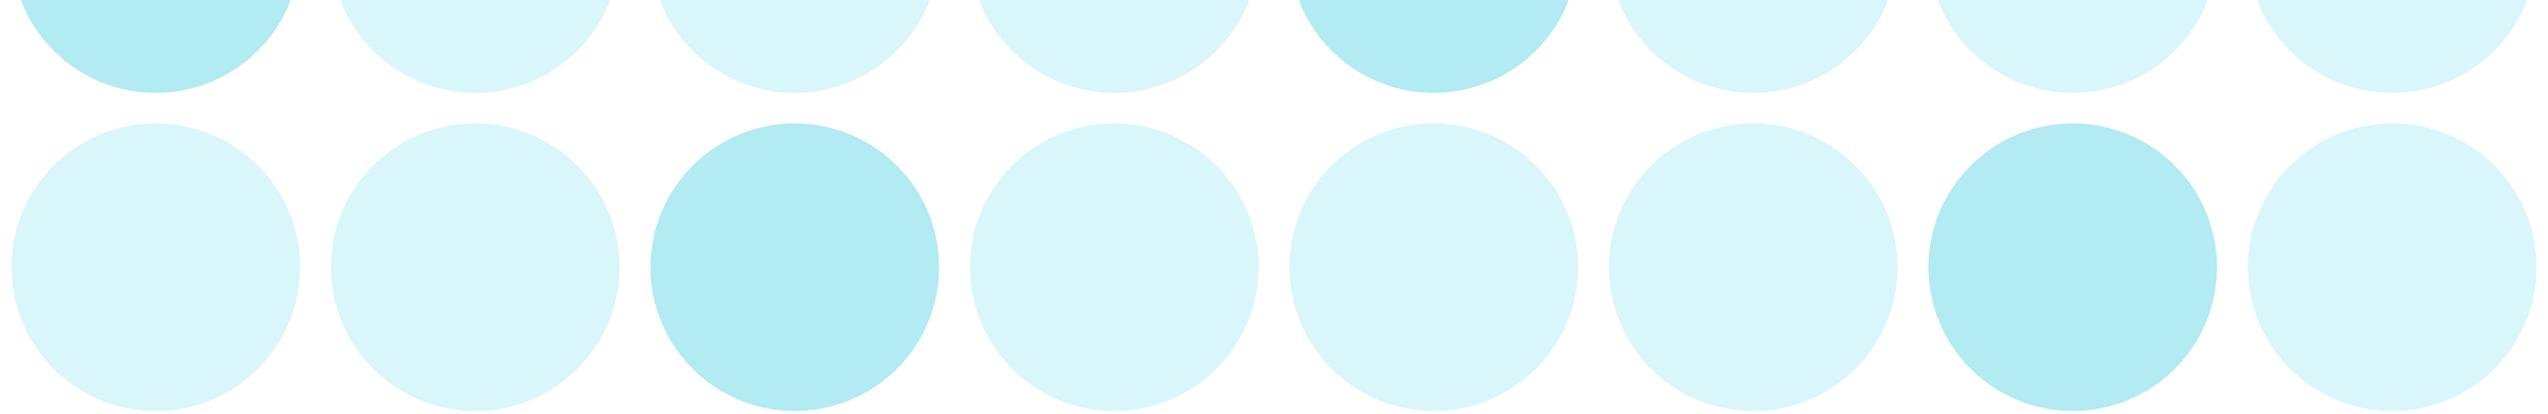

Practice in a trustworthy manner.

### Competence

Practice within scope and develop expertise.

information on  
above

# Ethical Responsibility

# Self-Care as an Ethical Responsibility

Prolonged stress and compassion fatigue can impact decision making.

**Self-care can impact ethical practice by:**

- Enhancing clinical competence
- Supporting professional boundaries
- Promoting consistence in ethical standards
- Encouraging reflective practice
- Foster support systems, resilience building skills, meaning and purpose, flexibility and adaptability

# Ethical Domains

**Competence**

**Dual Relationships**

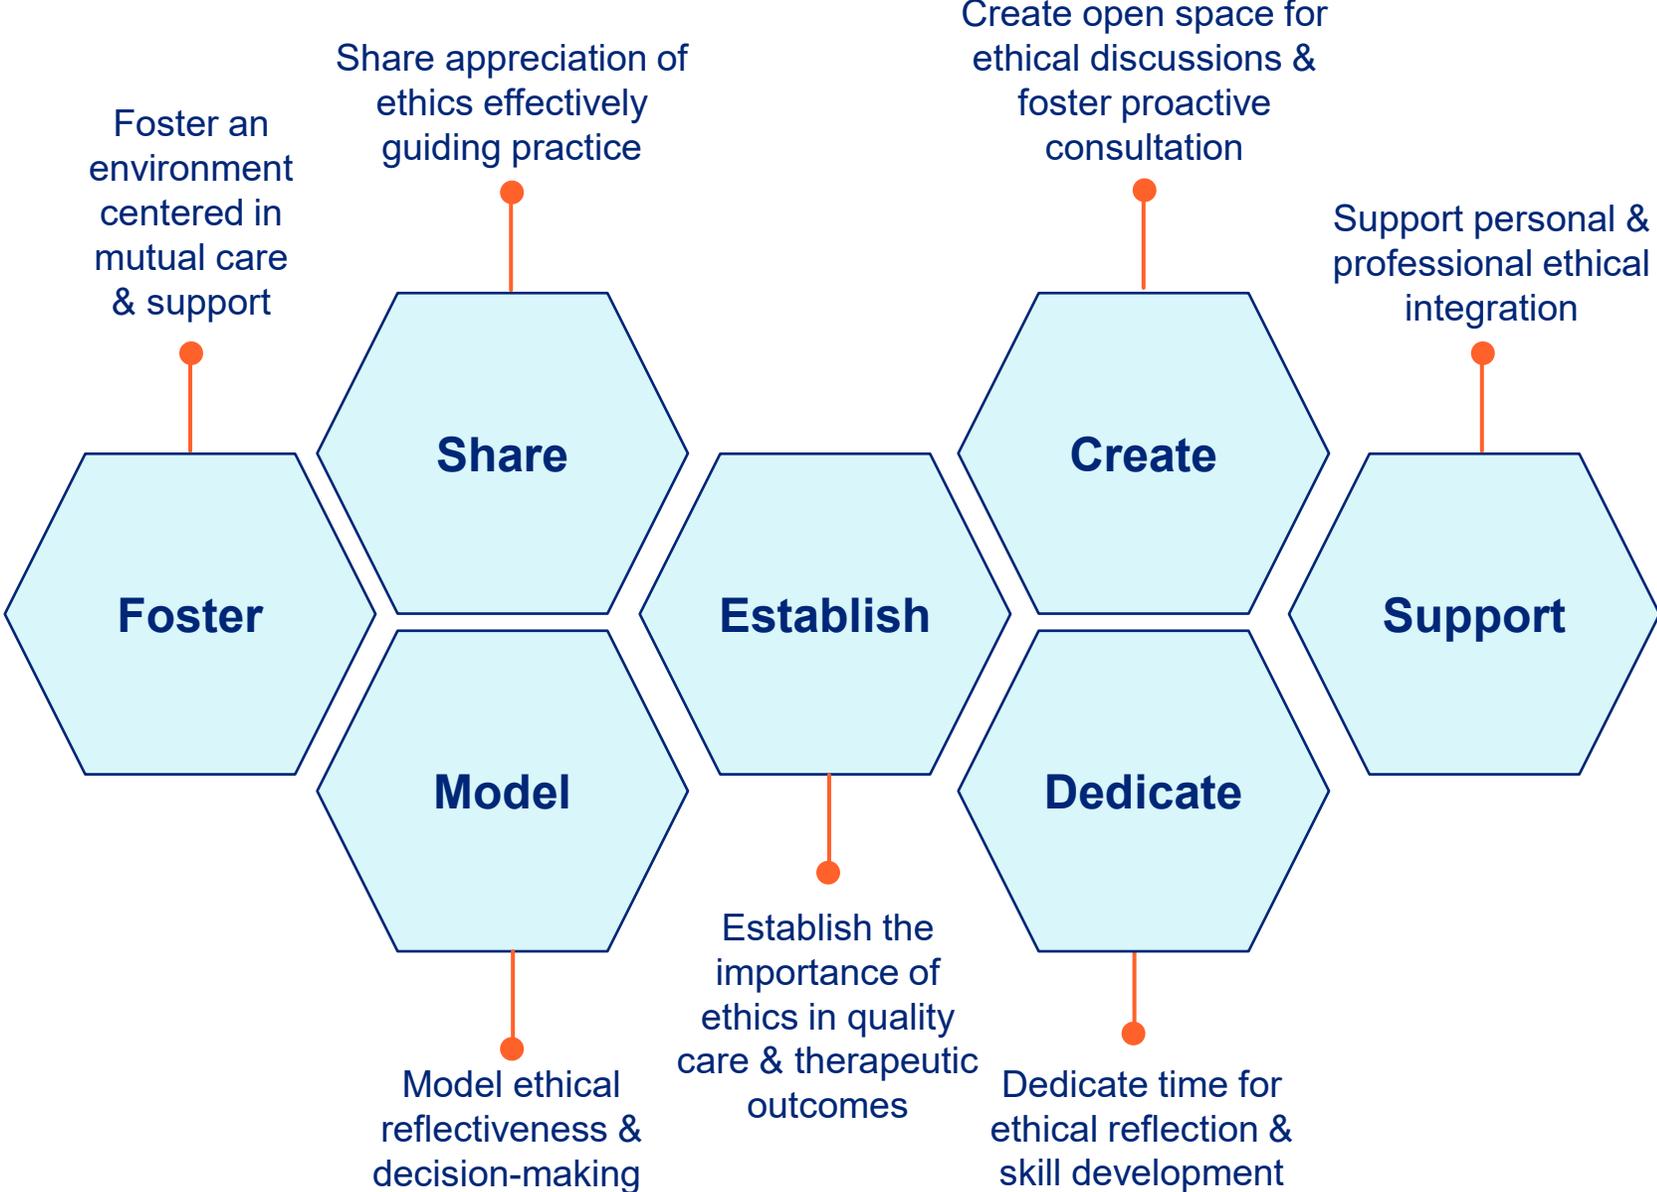

**Informed Consent**

**Due Process**

**Confidentiality**

**Liability**

# Professional Ethical Acculturation

# Instilling Ethical Responsibility

Ensure awareness of potential dilemmas

Ensure ability to identify ethical ways to resolve

Create space to openly explore ethical issues

Address timely and effectively

Be aware of tendency to avoid

# Instilling Ethical Responsibility

*Let's discuss.*

---

Can you think of other ways to instill ethical responsibility than these examples?

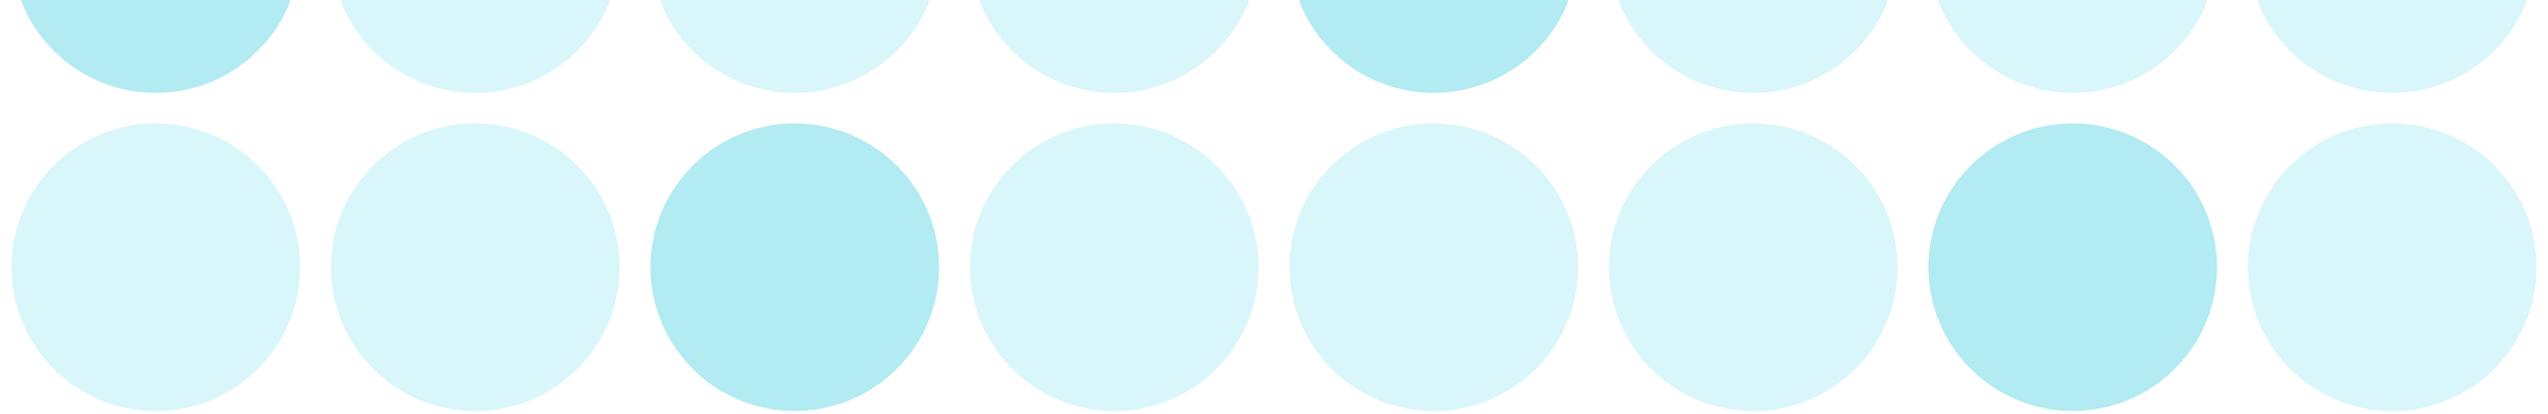

Ensure awareness of potential dilemmas

Address timely and effectively

Ensure ability to identify ethical ways to resolve

Be aware of tendency to avoid

Create space to openly explore ethical issues

# Ethical Dilemmas

# What is an Ethical Dilemma?

---

When adhering to one ethical principle may violate another

Making a decision when two or more ethical principles conflict with each other

# What is an Ethical Dilemma?

*Let's discuss. There is no "right answer."*

---

Describe a time when you have been faced with an ethical dilemma in your scope of care.

# Common Ethical Dilemmas

---

## *Self-Report Data- Most common ethically troubling incidents*

- Confidentiality
- Blurred/dual/conflictual relationships
- Payment sources, plans, settings, and methods
- Competency concerns
- Professional Misrepresentation

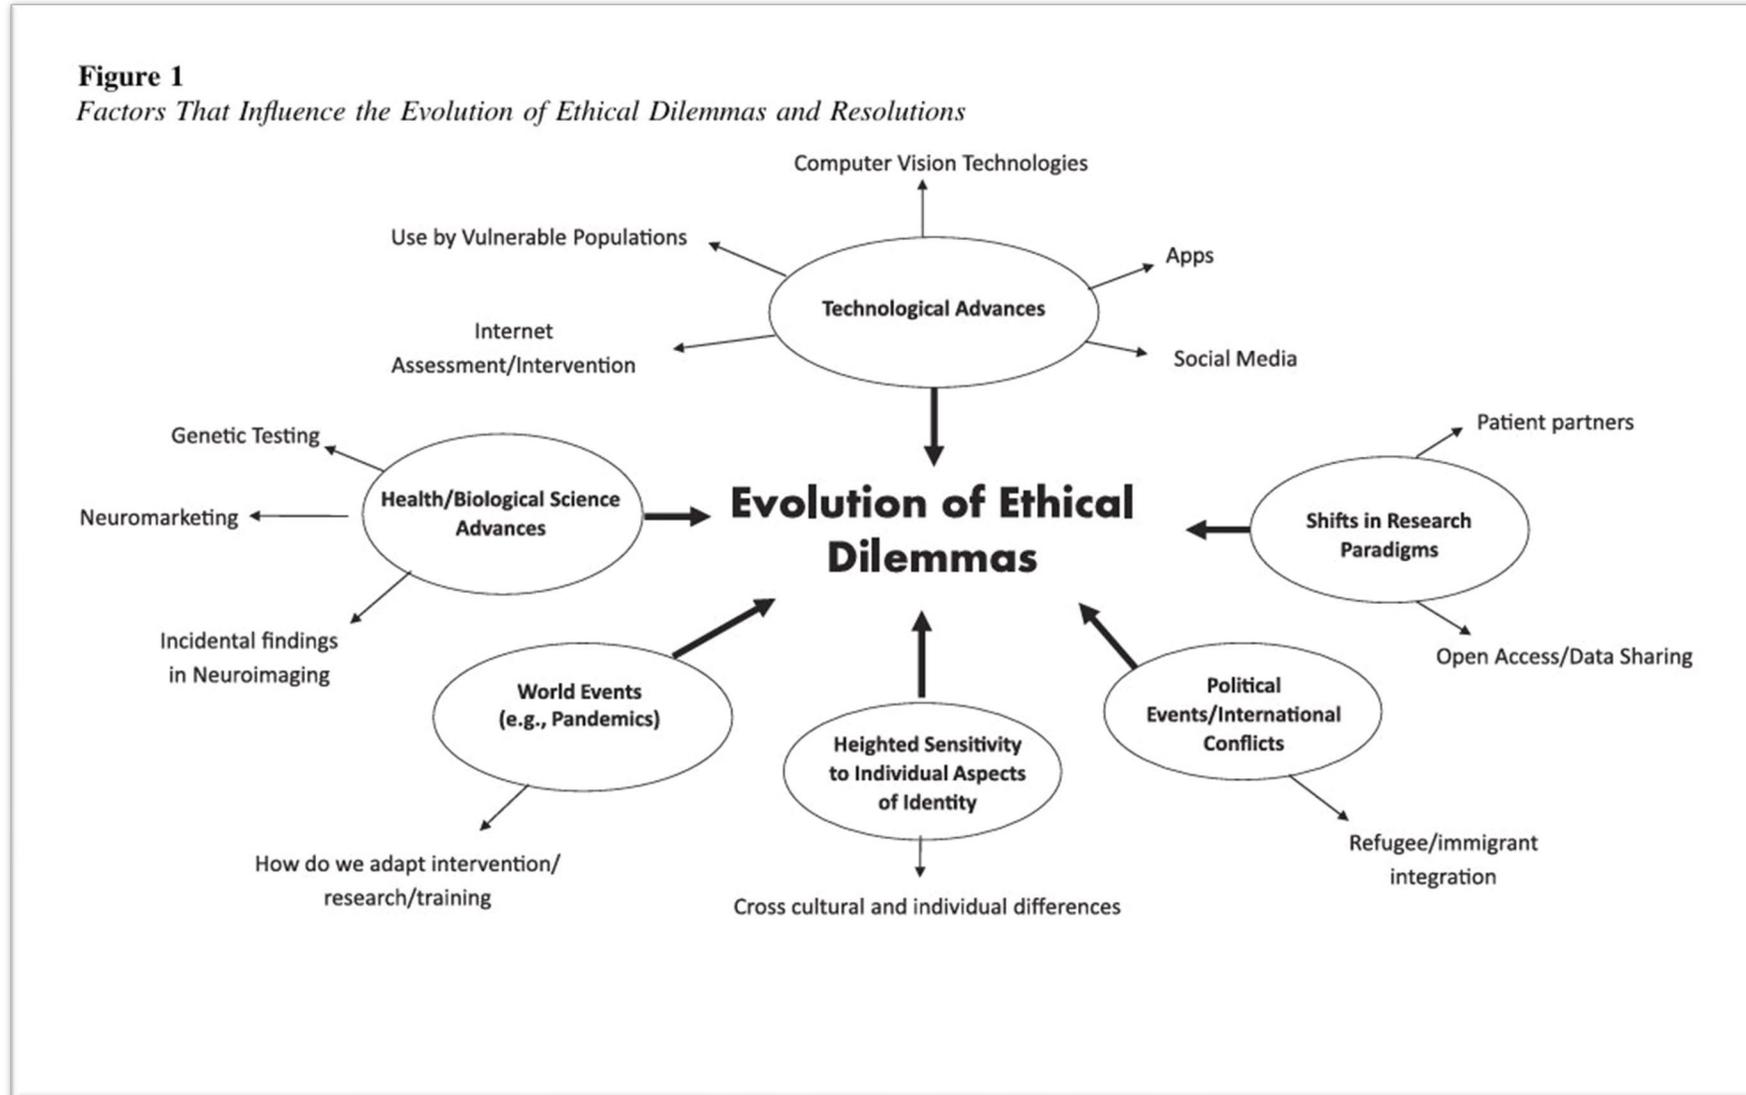

## *Top 3 most common reasons for disciplinary action (ASPPB, 2024):*

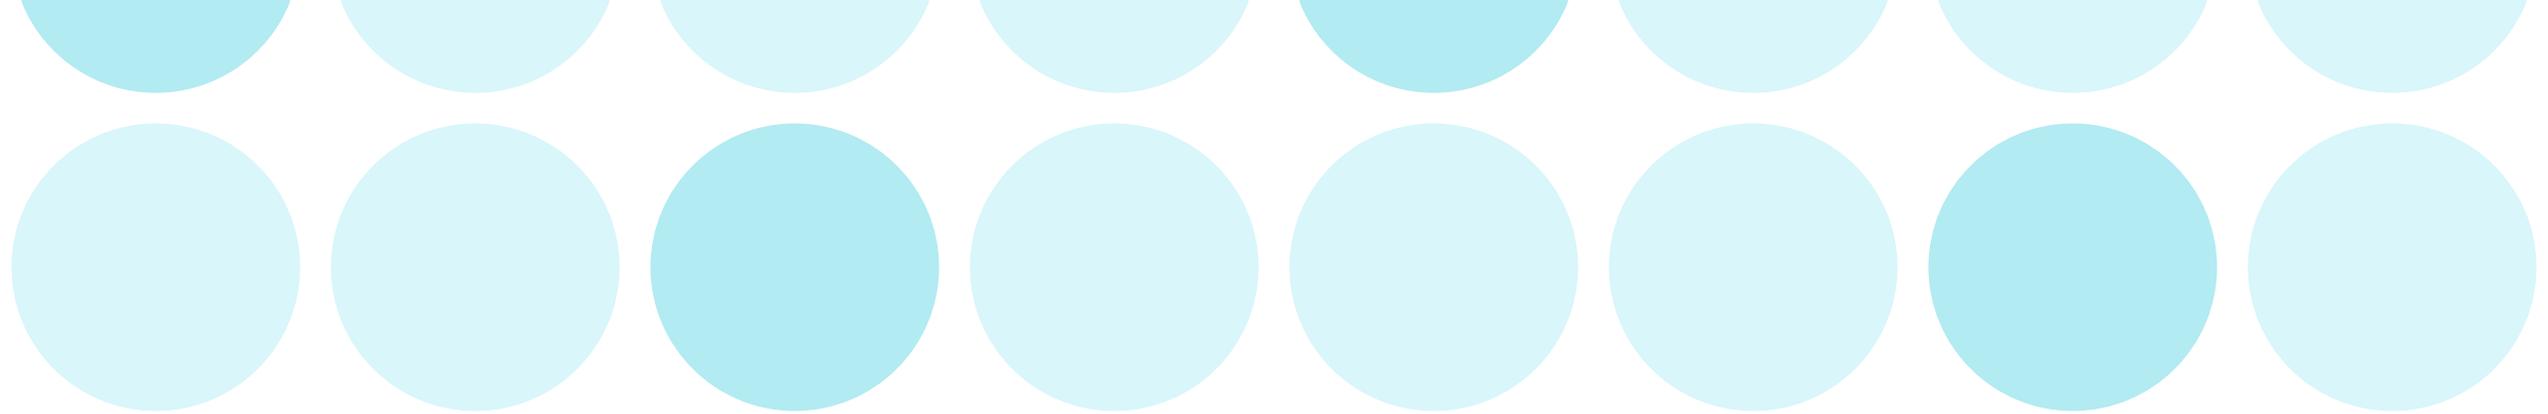

- Failure to comply with continuing education or competency requirements
- Negligence
- Unprofessional conduct

# The Evolution of Ethical Dilemmas

**Figure 1**

*Factors That Influence the Evolution of Ethical Dilemmas and Resolutions*

# Confidentiality

# Confidentiality and its Limits

---

Mandated Reporting

Vulnerable Adults

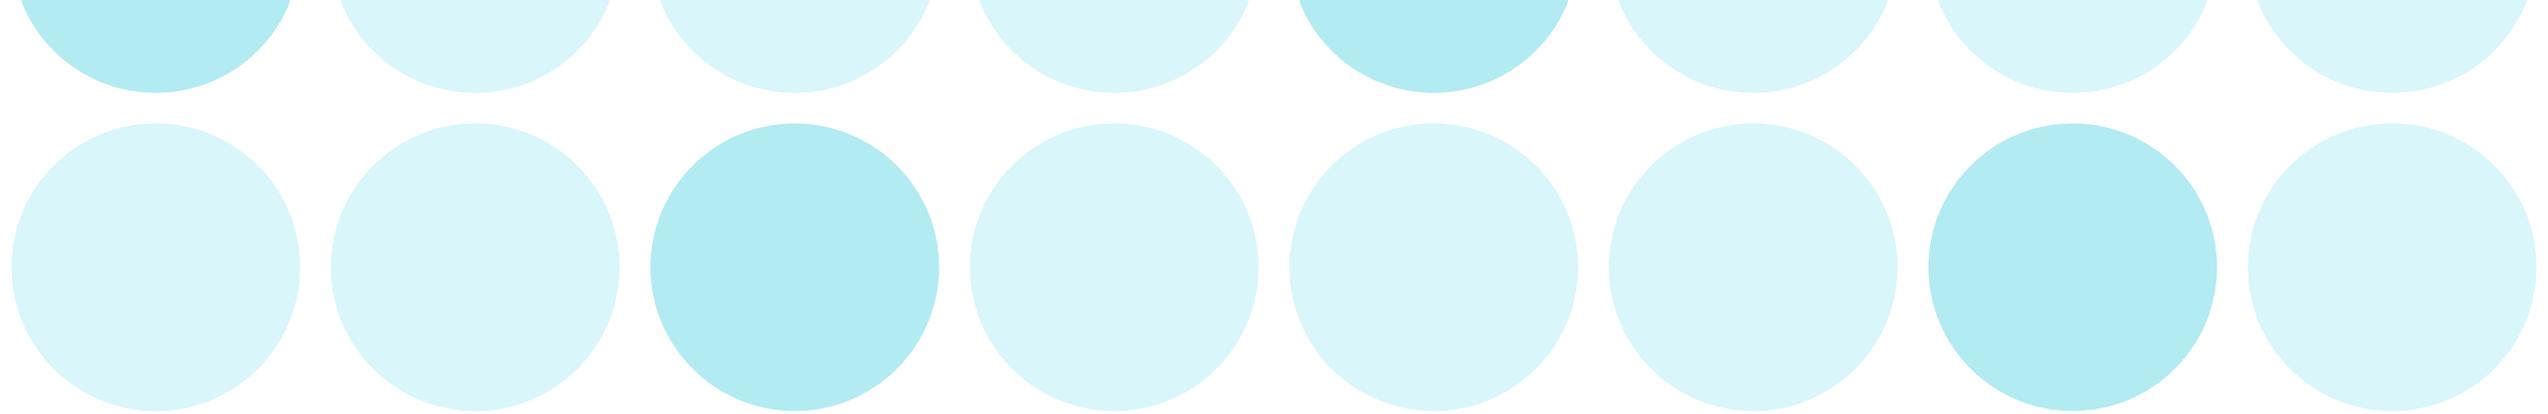

Legal Requirements

Minors

# Other Considerations

# General Considerations

---

Maintaining **objectivity**

Fostering **self-awareness**

Use of **supervision & consult**

Personal **therapy**

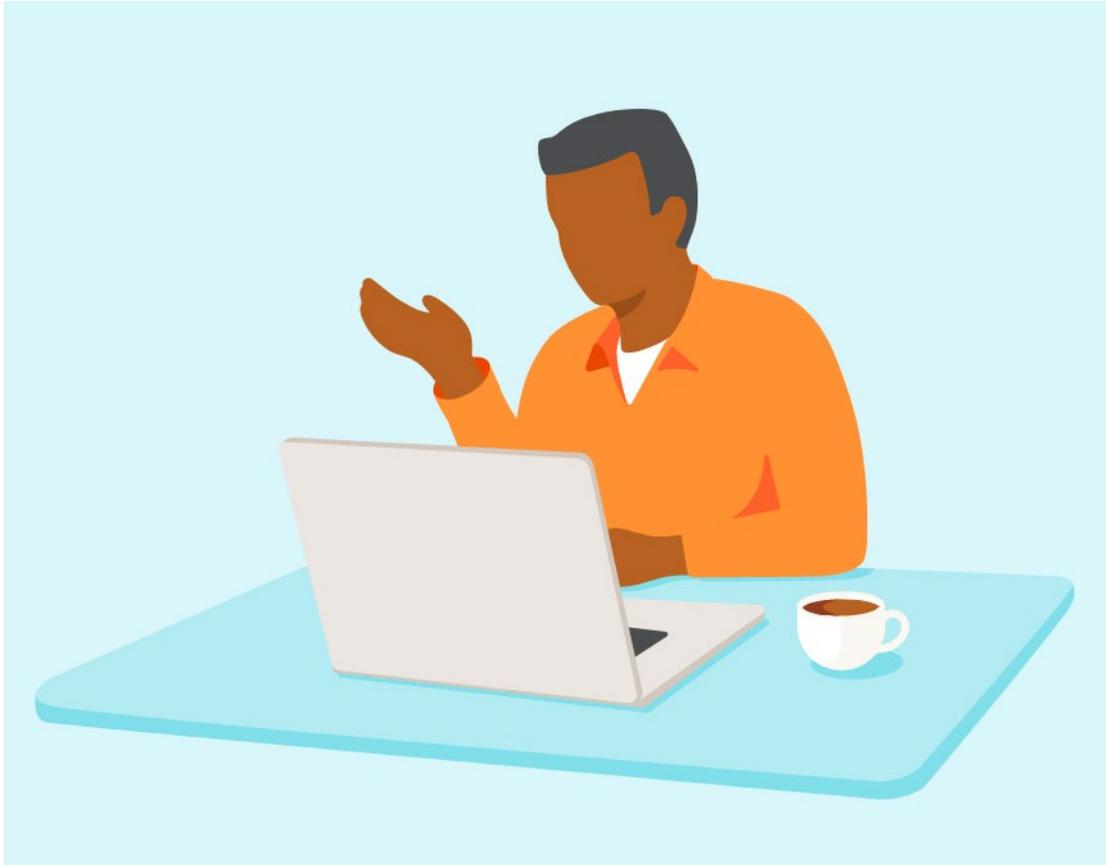

**Fidelity** for using clinically appropriate assessments

**Competency** with certain presenting concerns

Informed **consent** for specialized treatments

Dialogues on **safety** for client and community members

# Telepsychology Ethical Considerations

## **Applicability**

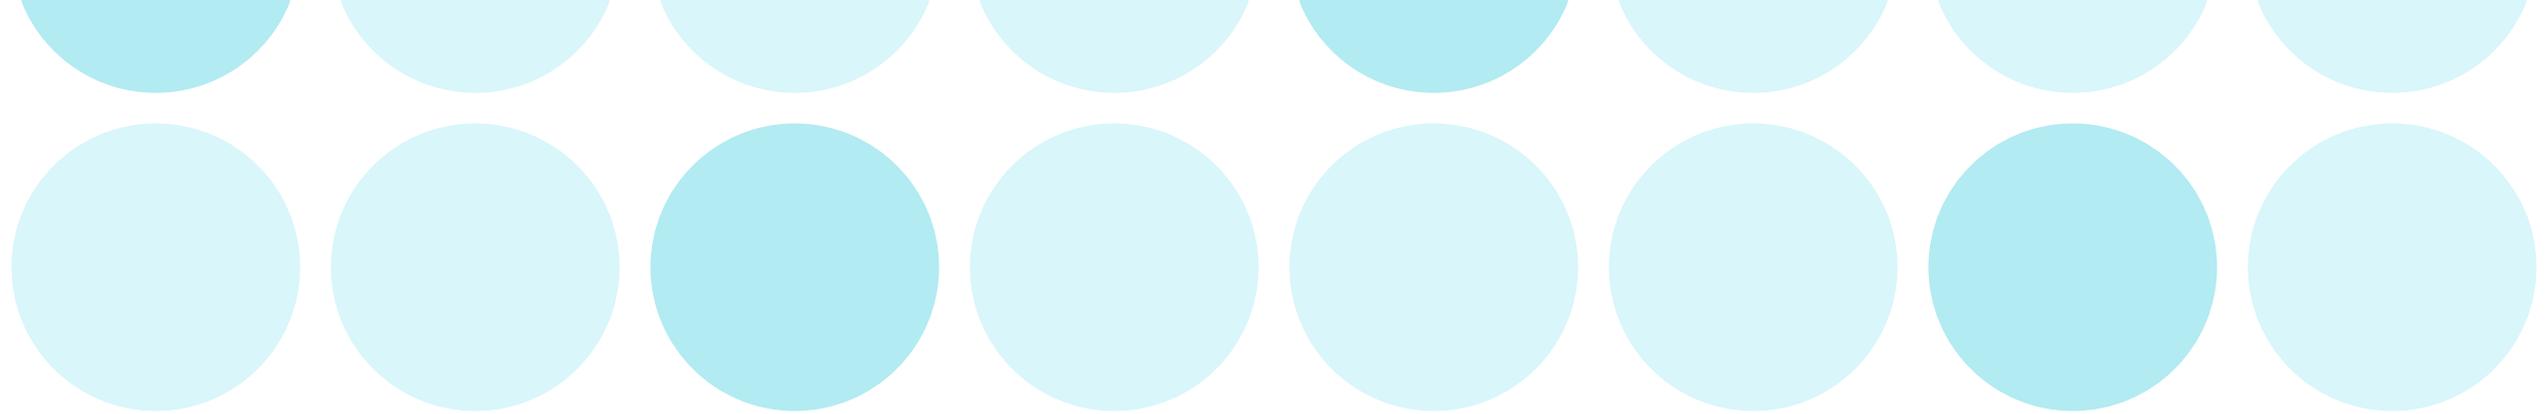

- Case by case
- Continual needs assessment

## **Standards of Care**

- Establish benefits & risks
- Collaborate on appropriateness

## **Informed Consent**

- Appropriateness
- Limits to confidentiality
- Emergency procedures
- Identify cultural factors

# Ethical Decision-Making Approaches

# What is Ethical Decision- Making?

The process by which behavioral health professionals identify, analyze, and resolve ethical dilemmas

Importance in clinical practice to ensure integrity, trust, and the best interest of clients

Includes use of evidence- based framework for clinician to follow each time

# What is Ethical- Decision Making?

*Let's discuss.*

---

In your own words, what is ethical- decision making, and what does that mean for you as a provider?

# Why is Ethical Decision-Making Important?

Let's discuss.

Promotes client welfare

Protects clients and professionals from harm

Ensures ethical standards and professional integrity

# Fostering Ethical Decision Making

- Foster supportive collegial relationships for co-workers to bring ethical concerns
- Preemptively review ethical/legal issues that arise in consultation
- Discuss ethical principles, codes, standards regularly
- Provide information on agency-specific policies
- Normalize the occurrence of ethical dilemmas
- Support recognizing subtle & overt ethical dilemmas
- Consider cultural factors related to dilemma

# Ethical Decision-Making: Best Practices

## Cognitive and Emotional Process:

- Ethical decision-making involves both aspects
- Identify/explore: issues, values, principles, & regulations

## Comprehensive Discussion:

- Discuss consequences & benefits of potential actions
- Explore actions that best achieve fairness, justice, fidelity

## Decision-Making Steps:

- Guide decision-making process in ethical dilemmas
- Evaluate actions to ensure ethical principle alignment

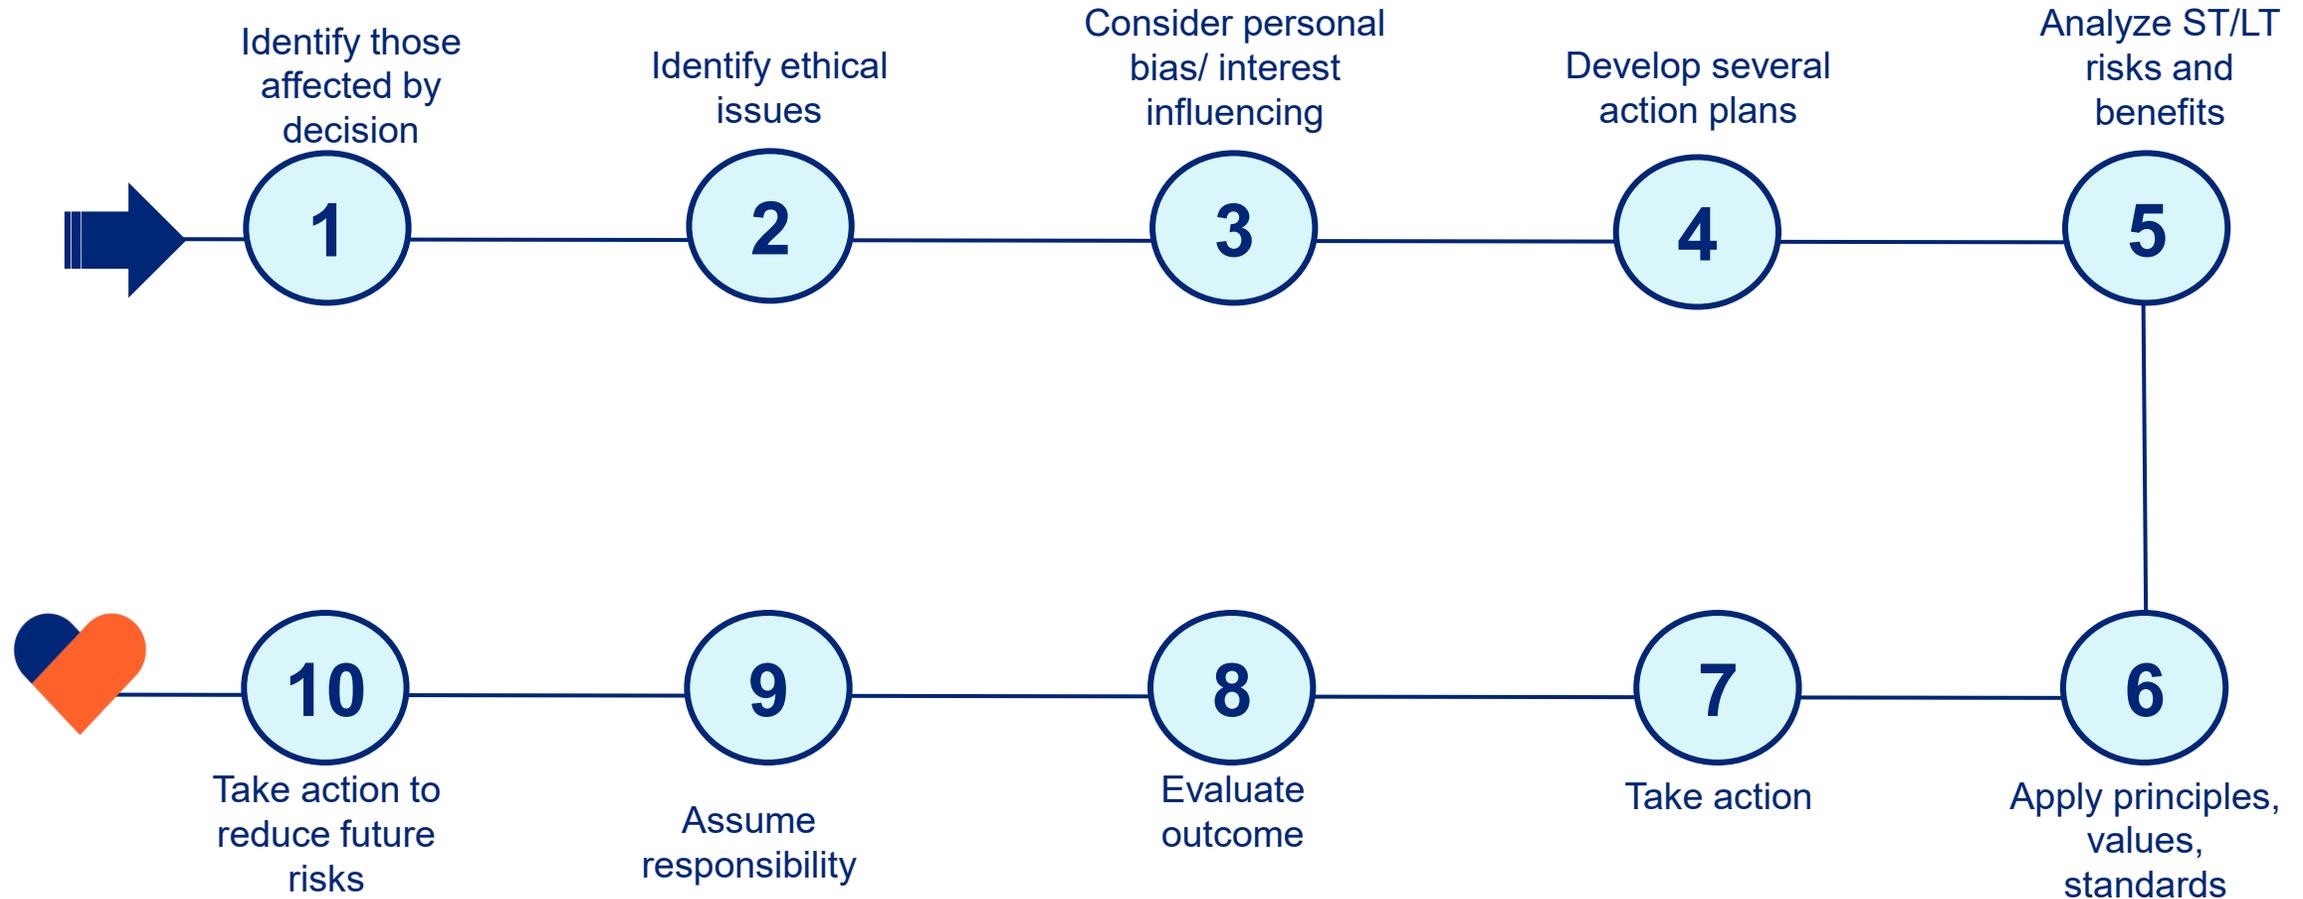

## Addressing Ethical Mistakes:

- Dyad works to ameliorate any negative outcome
- Focus on learning from mistakes to prevent recurrence

## Reporting Violations if Necessary:

- Report ethical violations to Board when necessary
- Adherence & accountability to professional standards

# 10 Steps for Ethical Decision- Making

# Steps for Ethical- Decision Making

*Let's discuss.*

---

Can you think of a time when you weren't able to follow the necessary steps for ethical decision-making?

What is an action plan that you have created in the past in regard to ethical decision-making?

# Best- Practices for Ethical Consultation

Build a strong working alliance to support navigating ethical dilemmas with colleagues

Draw from own experiences, model nuance/reflection to explore points of conflict/connection

Explore how beliefs impact work & collaborate on ethically-minded approaches

Engage thoughtfully, empathically, sensitively, nondefensively & without accusation

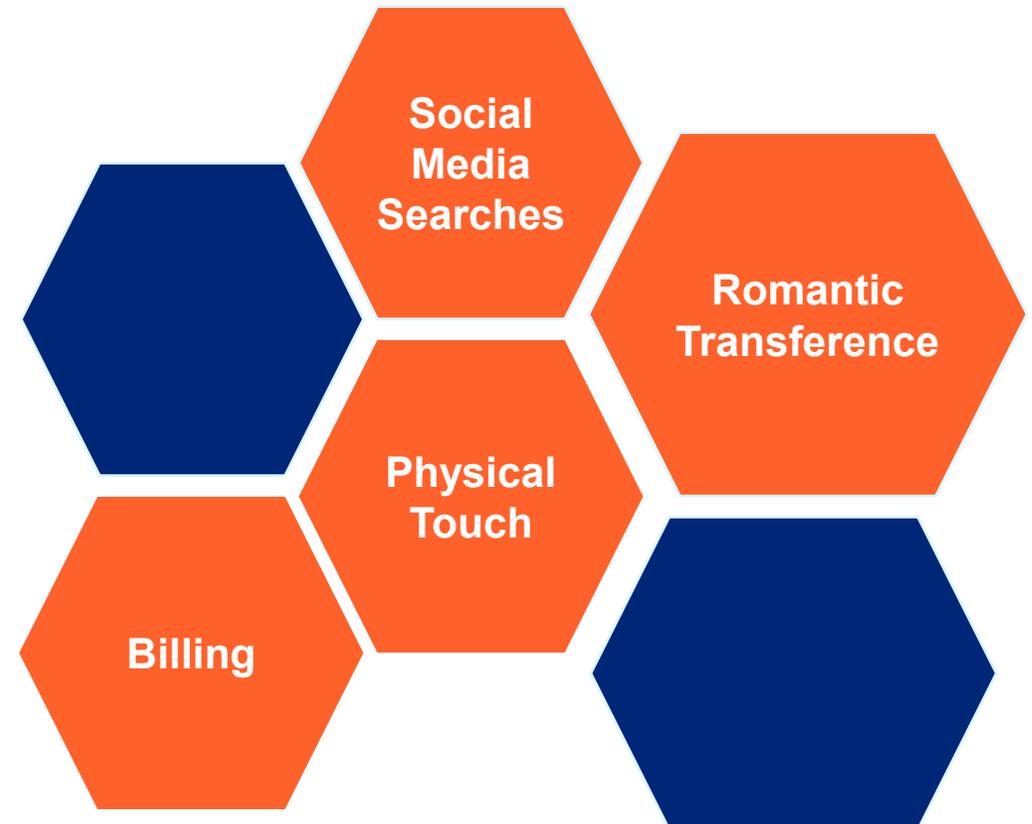

Maintain respect for provider autonomy, disclose areas of discomfort, & discuss difficult issues

# Ethical Topics for Preemptive Exploration

*Let's discuss. For each topic, answer the following questions:*

---

- What is the motivation/rationale?
- How may it harm the client?
- How may it possibly benefit?
- What would be follow up to the outcome?
- How do I monitor my motivations?

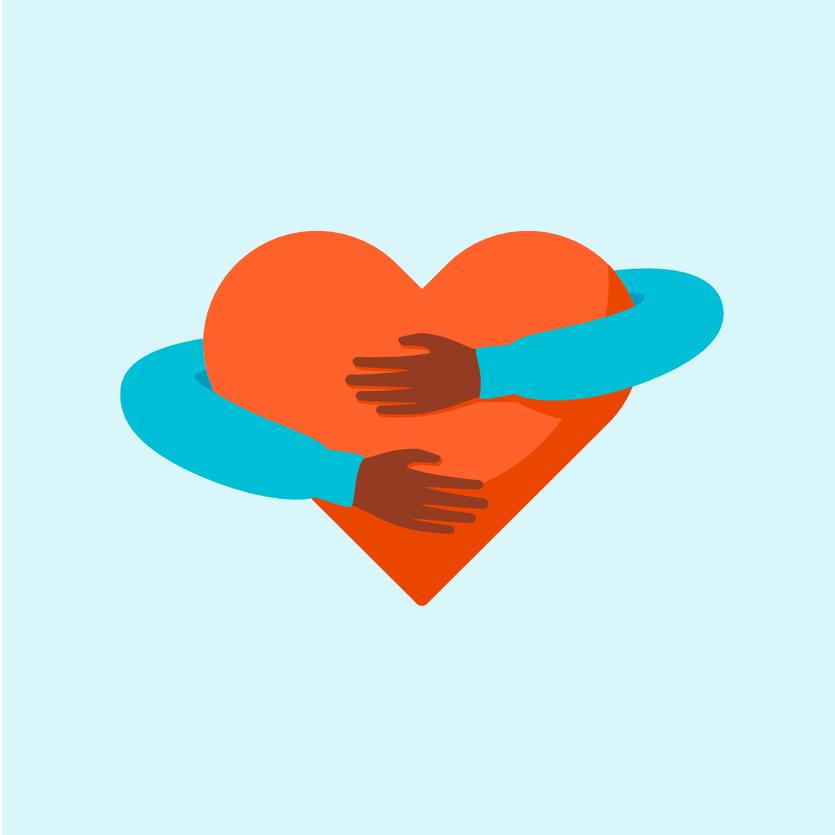

# Ethics Decision-Making Model

- E** → Evaluate the dilemma
- T** → Think ahead
- H** → Help
- I** → Information
- C** → Calculate Risk
- S** → Select an Action and Document

# Effectiveness of Ethical Decision-Making Models

Relationship between self-efficacy and ethical decision-making model impacting ethical decision making:

**Self-efficacy may impact perceptions of moral intensity.**

- Lower self-efficacy associated with lower empathy
- Empathy associated with more sound ethical decision making

**Use of cognitive (structured tool) associated with more sound ethical decision making.**

- Compared to lack of use of a structured tool

# Cultural Considerations: Body-Based Ethical Decision-Making

---

Embodied ethical decision-making (EEDM)

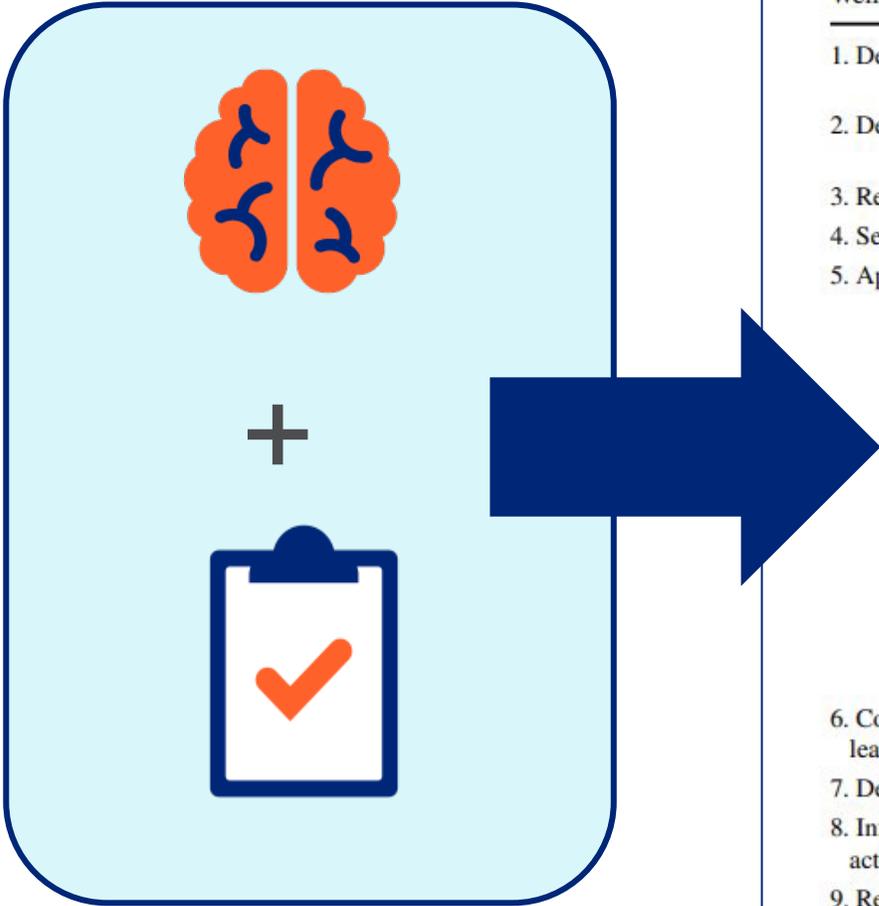

Combination of traditional cognitive approaches with body-based approaches – as ethics is often linked to bodily sensations of right and wrong

Incorporate bodily sensations into ethical decision-making model. Bodily responses in ethical dilemma include a sense of urgency, feeling shaky, tingling, "flutters" in stomach

# Pairing EEDM with Cognitive Approach

**Table 1** Ethical model paired with EEDM steps

Welfel's Ethical Decision-Making Steps	Hervey's EEDM Steps
1. Develop ethical sensitivity	Notice shifts in body; Explore movement in horizontal plane
2. Define the dilemma and options	Recreate movement postures of people involved; move most outrageous options
3. Refer to professional standards	Use of weight in vertical plane
4. Search out ethics scholarship	Move ethical dilemma
5. Apply ethical principles to the situation	Autonomy Create imaginary space & boundaries; move in vertical plane Nonmaleficence Careful & cautious movement using bound flow & lightness Beneficence Shaping, widening, opening with horizontal plane Justice Balancing movements Fidelity Movement with weight Additional: Veracity Spinal movements and free flow
6. Consult with supervisor and respected colleagues	Use of verbal or movement communication to create way of sharing dilemma
7. Deliberate and decide	Move alone; rehearse acting out plans and decisions
8. Inform supervisors, implement and document actions	Use of time in sagittal plane
9. Reflect on the experience	Reflect & evaluate

Adapted from Welfel (2001) and Hervey (2007)

# Active Multicultural Diversity

Using the EEDM model promotes the 3Ms:

## **Movement toward Mutuality:**

Participants in the ethical dilemma must be willing to change where possible and appropriate in order to see each other as equal individuals while collaborating to resolve the ethical dilemma.

## **Mutual empowerment:**

Both providers and clients experiencing the feeling of having control and understanding one's own life.

## **Mutual empathy:**

The ability to be impactful and to be impacted in the relationship through seeing and feeling within the experience

# Four Bin Approaches to Ethics

## LEGAL

Laws

Regulations

Statutes

## CLINICAL

Objectivity

Boundaries

Relationship

## ETHICAL

Principles

Guidelines

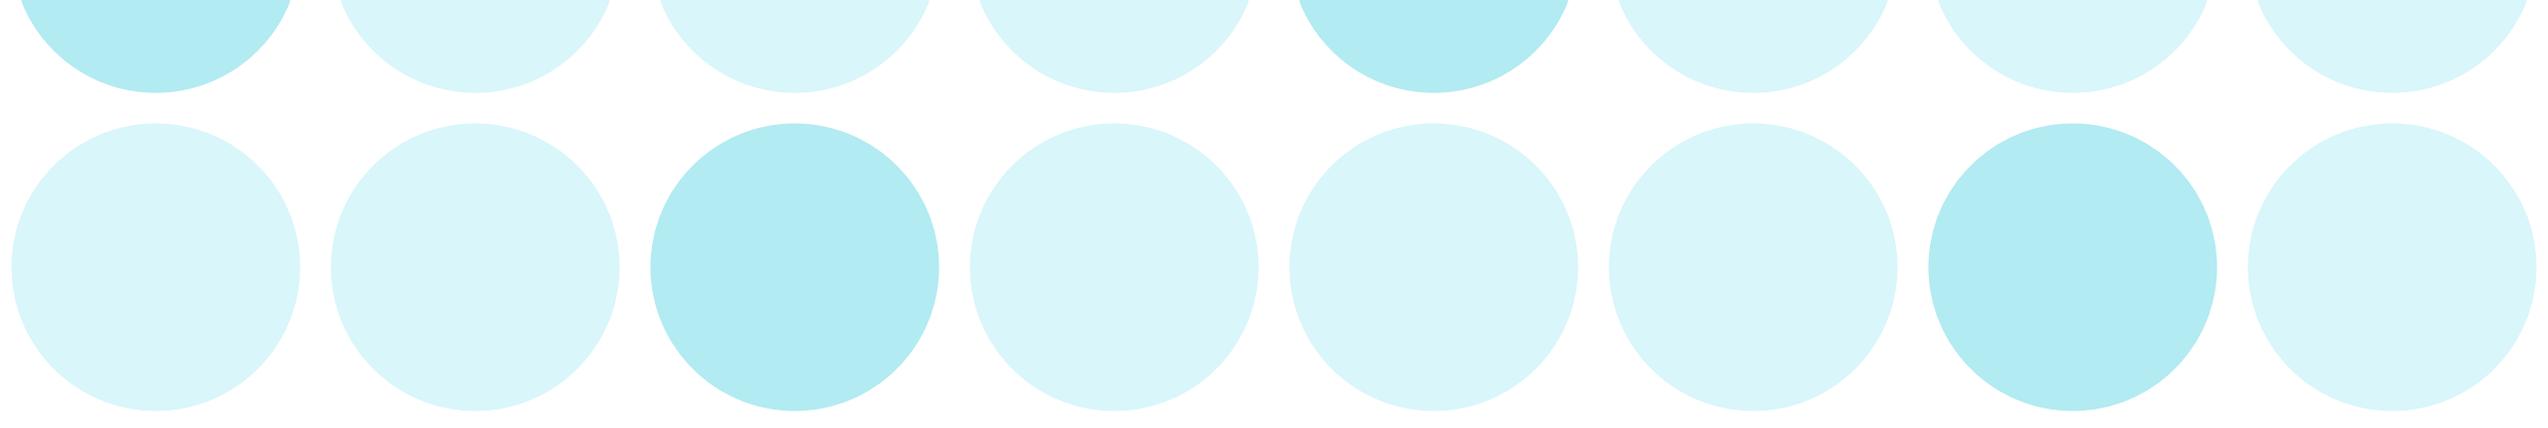

Codes

## RISK MGMT

Increased

Decreased

Liability

# **Multidisciplinary Care Supports Ethical Decision-Making**

# Care Coordination

## Who do you need to coordinate with?

- PCP
- Previous Providers
- Other service providers

## Documentation

- Be mindful of what/ how documentation is done
- What is disclosed in documentation

## Forms/FMLA

- Will client be looking for something from provider?
- Can provider complete request?
- How does it impact treatment?

# Care Coordination

*Let's discuss.*

---

Can you think of a time when you had to consider what/how documentation is done/ what is disclosed?

Can you think of a time a provider you have coordinated with has impacted treatment?

# Working as a Team to Support Ethical Decision- Making

- Attend regular consultation meetings
- Initiate consultation when necessary
- Building rapport with other providers, multidisciplinary relationships
- Obtain ROI from clients for care coordination
- Honor client's autonomy by sharing benefits/risks of signing ROI and allowing them to make fully informed decision
- Remain open to other providers' practices and ethical obligations
- Use ethical decision making model when there is a dilemma (ETHICS)
- Use information shared to create plan/goals to benefit client
- Can incorporate other disciplines' perspectives in Ct's treatment plan when appropriate (medication compliance, strategies for remembering to take medication)

# Social Work Ethical Decision- Making Model

- 1) What is the ethical dilemma? Clearly articulate the professional values that are in conflict. What personal values if any may be influencing my decision making? Is there a conflict between my personal and professional values?
- 2) What is my immediate reaction or instinct for the best way to address the ethical dilemma?
- 3) Consult the CASW (2005) Code of Ethics and Guidelines for Ethical Practice. Does the Code provide direction and guidance? Identify the sections from the Code of Ethics and Guidelines for Ethical Practice that are applicable to the dilemma.
- 4) Consult applicable agency policies and best practice standards (e.g., NLASW Standards for Technology Use in Social Work Practice).
- 5) Are there legal considerations? Consult relevant legislation where necessary.
- 6) What are some of the cultural considerations?
- 7) Was this issue addressed through informed consent?
- 8) What are some of the available options or choices for resolving the dilemma? Analyze the risk and benefits of each option. What steps do I need to take to minimize risk and not compromise my ethical responsibilities?
- 9) Consultation with a peer, manager or supervisor can be extremely helpful.
- 10) Does the context of practice make a difference?
- 11) Discuss the dilemma with the client where appropriate.
- 12) Consider the impact on the therapeutic relationship.
- 13) What other resources might be helpful in my decision-making?
- 14) Document the ethical decision-making process. For additional information refer to the NLASW Standards for Social Work Recording (2014).
- 15) Monitor and evaluate the impact of the decision and modify if necessary.
